

September 21, 2026

Dear Valued Customer,

RoadSafe Traffic Systems is pleased to introduce our newest lineup of quality Truck Mounted Attenuator (TMA) trucks, built to support safer work zones, dependable roadway operations, and efficient fleet deployment. As a trusted provider of traffic control and work zone safety solutions, RoadSafe brings together durable truck platforms, safety-focused upfitting, and the equipment customers need to help protect crews and motorists.

Our current lineup includes the TS-226, TS-228, TS-229, TS-230, TS-231, and TS-232 TMA trucks. Each unit is prepared with quality workmanship and practical work-zone functionality in mind, giving your team reliable options for highway, municipal, utility, and contractor applications.

Please review the available units below and complete the pricing fields as needed. We would welcome the opportunity to discuss availability, specifications, and any additional options that may help meet your project or fleet requirements.
